

ADDENDA #1 TO WARREN COUNTY BROADBAND RFP POSTED 11-22-2022

The County has received feedback and seeks to clarify three items in the RFP to ensure applicants have sufficient opportunity to plan their proposal(s):

1. The County is utilizing the Indiana BOT procurement statute to allow maximum flexibility in the final solution which may contain a County ownership component. The County has preference for, but no requirement of, asset ownership. The County will entertain any solution that meets the broadband goals and outcomes found in the RFP.
2. The RFP provided general information of potential interest and expansion opportunities in the adjacent areas outside of Warren County, namely, Vermillion County. Applicants are not required to include any plans or figures of services outside of the County. No County funds would be utilized for Vermillion or other adjacent areas outside of the County.
3. Any questions as to potential Vermillion County needs, coverage or financial participation can be directed to: Doug Hess, douglas@vermillioncountyedc.com
